Copy 4 of 4
20 June 1975

MEMORANDUM FOR: [] Chief, Nuclear
Energy Division, Office of Scientific
Intelligence

25X1

SUBJECT: Nuclear Intelligence Panel Report

1. George Steeg, Director for Reconnaissance and EW Systems, ASD(I) Staff, remarked to me on 13 June that he had just read the Nuclear Intelligence Panel Report (minutes?) dated 2 May 1975 []. He stated that the Panel (which met on 13-14 March) concluded that Soviet anti-ship missiles' CEP's were so large that they would require nuclear warheads to be effective. Since these missiles use either active or semi-active homing, George was somewhat at a loss as to how the Panel could arrive at a gross CEP estimate.

2. I told George that I'd refer the matter to you and suggested that he call you. If you should care to initiate the communication, his phone number is 11-74540.
